

FIRE DETECTION AND MONITORING

Solid Systems for Solid Security

Although our name implies protection against crime, we also provide the highest quality ***NON-PROPRIETARY*** fire equipment and monitoring. Why the emphasis on the non-proprietary aspect? Simply stated—**FREEDOM** of **CHOICE**. Not just before the sale, but after the sale. Freedom from being stuck with poor service from a sole-source supplier; Freedom from being stuck with outlandish charges and fees because you have no other options. We only install equipment like Fire•Lite and Silent Knight, which are available to all fire alarm service providers. If our company is not able to provide the level of service you demand, any other alarm company in the area is a possible choice to replace us. We don't expect that to happen, but isn't it reassuring to know that **YOU** can change **YOUR** mind? Isn't it reassuring to know that we have to continually earn your business and your confidence? Isn't it reassuring to know that we can't gouge you on service calls or monitoring, because **we** know you have the **FREEDOM** to replace us. Isn't that what you deserve? (See also our "CornerStone Covenant" for additional assurance that you have chosen the right company.)
