

# Access Control for Property Managers

*Solid Systems for Solid Security*

## **Brivo® econtrol Online Access Control™ increases property marketability, tenant retention while reducing operating costs**

Brivo econtrol Online Access Control eliminates reliance on outdated modem and PC technology while providing ultimate flexibility for both Property Managers and Tenants.

- **Provide "self-service" access control for tenants.** With tiered administration, Property Managers can allow tenants to administer changes to their part of the system without losing control or incurring additional costs.
- **Improve tenant convenience.** Brivo's simple interface eliminates tenant hassles with complicated access control systems or third-party procedures. Tenants can remotely manage access to their own offices and facilities.
- **Improve crisis response and monitoring.** Incident information is delivered immediately via email, phone or pager. A digital record of all system activity from all facilities is updated in real time.
- **Reduce tenant operating costs.** Brivo provides cost-effective operation and scalability by eliminating IT costs required by traditional electronic access control.
- **Operational efficiency** by freeing the Property Manager to administer the system from any computer, even at home; response times to issues even after hours are significantly improved.
- **Upgrade existing access control systems easily.** Because the Brivo econtrol Online Access Control is compatible with industry standard reader technology, Property Managers can combine multiple existing systems without incurring significant installation costs.
- **State-of-the-art amenity.** With regular software upgrades included as part of ACS WebService™, the latest technology is always available to property managers and tenants.

### **What They're Saying ...**

"Usually when you change over to these systems [enterprise electronic access control] you expect problems ... with ACS WebService, we've not had one glitch or problem."

— Darla Astrop, VEI Administrator and Brivo Customer
